## Business Form Press Machine

Business form press machine adopts a fully modular unit structure and consists of a paper feeding section, an offset printing section, a coding section, a processing section, and a delivery section.

It can complete the functions of single or multiple web feeds, offset printing, single or multi-joint coding, multi-jointed single sheets, several page delamination, etc.

### **Technical specifications:**

Name: Business form press machine

Model: PPD-BFP470

Web width 470mm

The maximum paper roll diameter 1100mm

The maximum printing width 460mm

Version of the drum circumference 10"~24"

The highest speed machine 150m/min

Tel: +86-573-82571515 Whatsapp/Wechat: 0086 137 3685 9272

Paper weight 30~150g/m<sup>2</sup>

Mechanical maximum speed 150m/min

### **Paper delivery part:**

1. Max.diameter of web:1100mm.
2. With air-cooling magnetic powder brake for automatic control ofension.
3. NC paper scrap detection, and photoelectricity detection of paper breaking and joint.

### **Offset printing part:**

1. Version drum circumference of 10 "to 24", PS version of 0.15mm thick, the involved version on the structure, fabric thickness 0.94mm.
2. Adjustment range: circumference:360°; Axial:±5mm.
3. Pneumatic clutch, broken paper machine automatic alarm.

### **Marking and processing part:**

1. Man-machine interface, simple operation, a static elimination function.
2. Pneumatic dial, automatic dialing, ensure the number is accurate continuity.

### **Paper receiver part:**

1. A paper detection, automatic lift, counting device.
2. Having left and right paper and paper alignment device, paper receiver is flat and level.
